Live Emergency Dispatch Portal
AI-Powered
Crisis Dispatch
CrisisDesk AI integrates natural language understanding to immediately analyze, categorize, and deduplicate emergency reports from citizens—helping response teams prioritize life-saving actions.
Real-Time Classification
Instantly process reports into fire, flood, utilities, or medical emergencies.
Automated Severity Triage
Detects attention to critical threats first based on semantic description analysis.
Duplicate Incident Merging
Connects nearby reports to prevent dispatcher dashboard congestion.
Emergency Citizen Portal
Provide precise location and incident details below. CrisisDesk AI parses and triages your report automatically.
